PERSONAL PROJECTS

News App (by using react) (11/2023 - 01/2024)
- NewsFlash is a mobile application designed to deliver the latest news and updates from various sources in a convenient and user-friendly format. With NewsFlash, users can stay informed about current events, trending topics, and personalized interests anytime, anywhere.
- **Real-time Updates:** News articles are updated in real-time, ensuring users have access to the latest information as it happens.
- **Personalized News Feeds:** The app provides customized news feeds based on user preferences, browsing history, and selected topics of interest.

Authentication App (by using React) (01/2024 - 03/2024)
- ReactAuth is a powerful authentication application built using React.js, designed to provide secure and streamlined authentication services for web applications. Developed with modern web technologies, ReactAuth offers a customizable and scalable solution for implementing user authentication, authorization, and account management features.
- **User Registration:** ReactAuth allows users to register for new accounts securely. Users can create unique usernames and passwords, providing the necessary information for account creation.
- **Login and Logout:** Registered users can log in to their accounts using their credentials. ReactAuth verifies user credentials securely and grants access to authorized resources. Additionally, users can log out of their accounts securely to terminate their sessions.
